

Cyber Security Career Roadmaps – Required Skills & Certifications

Presentation By :

Trillium InfoSec Systems

Digital Transformation

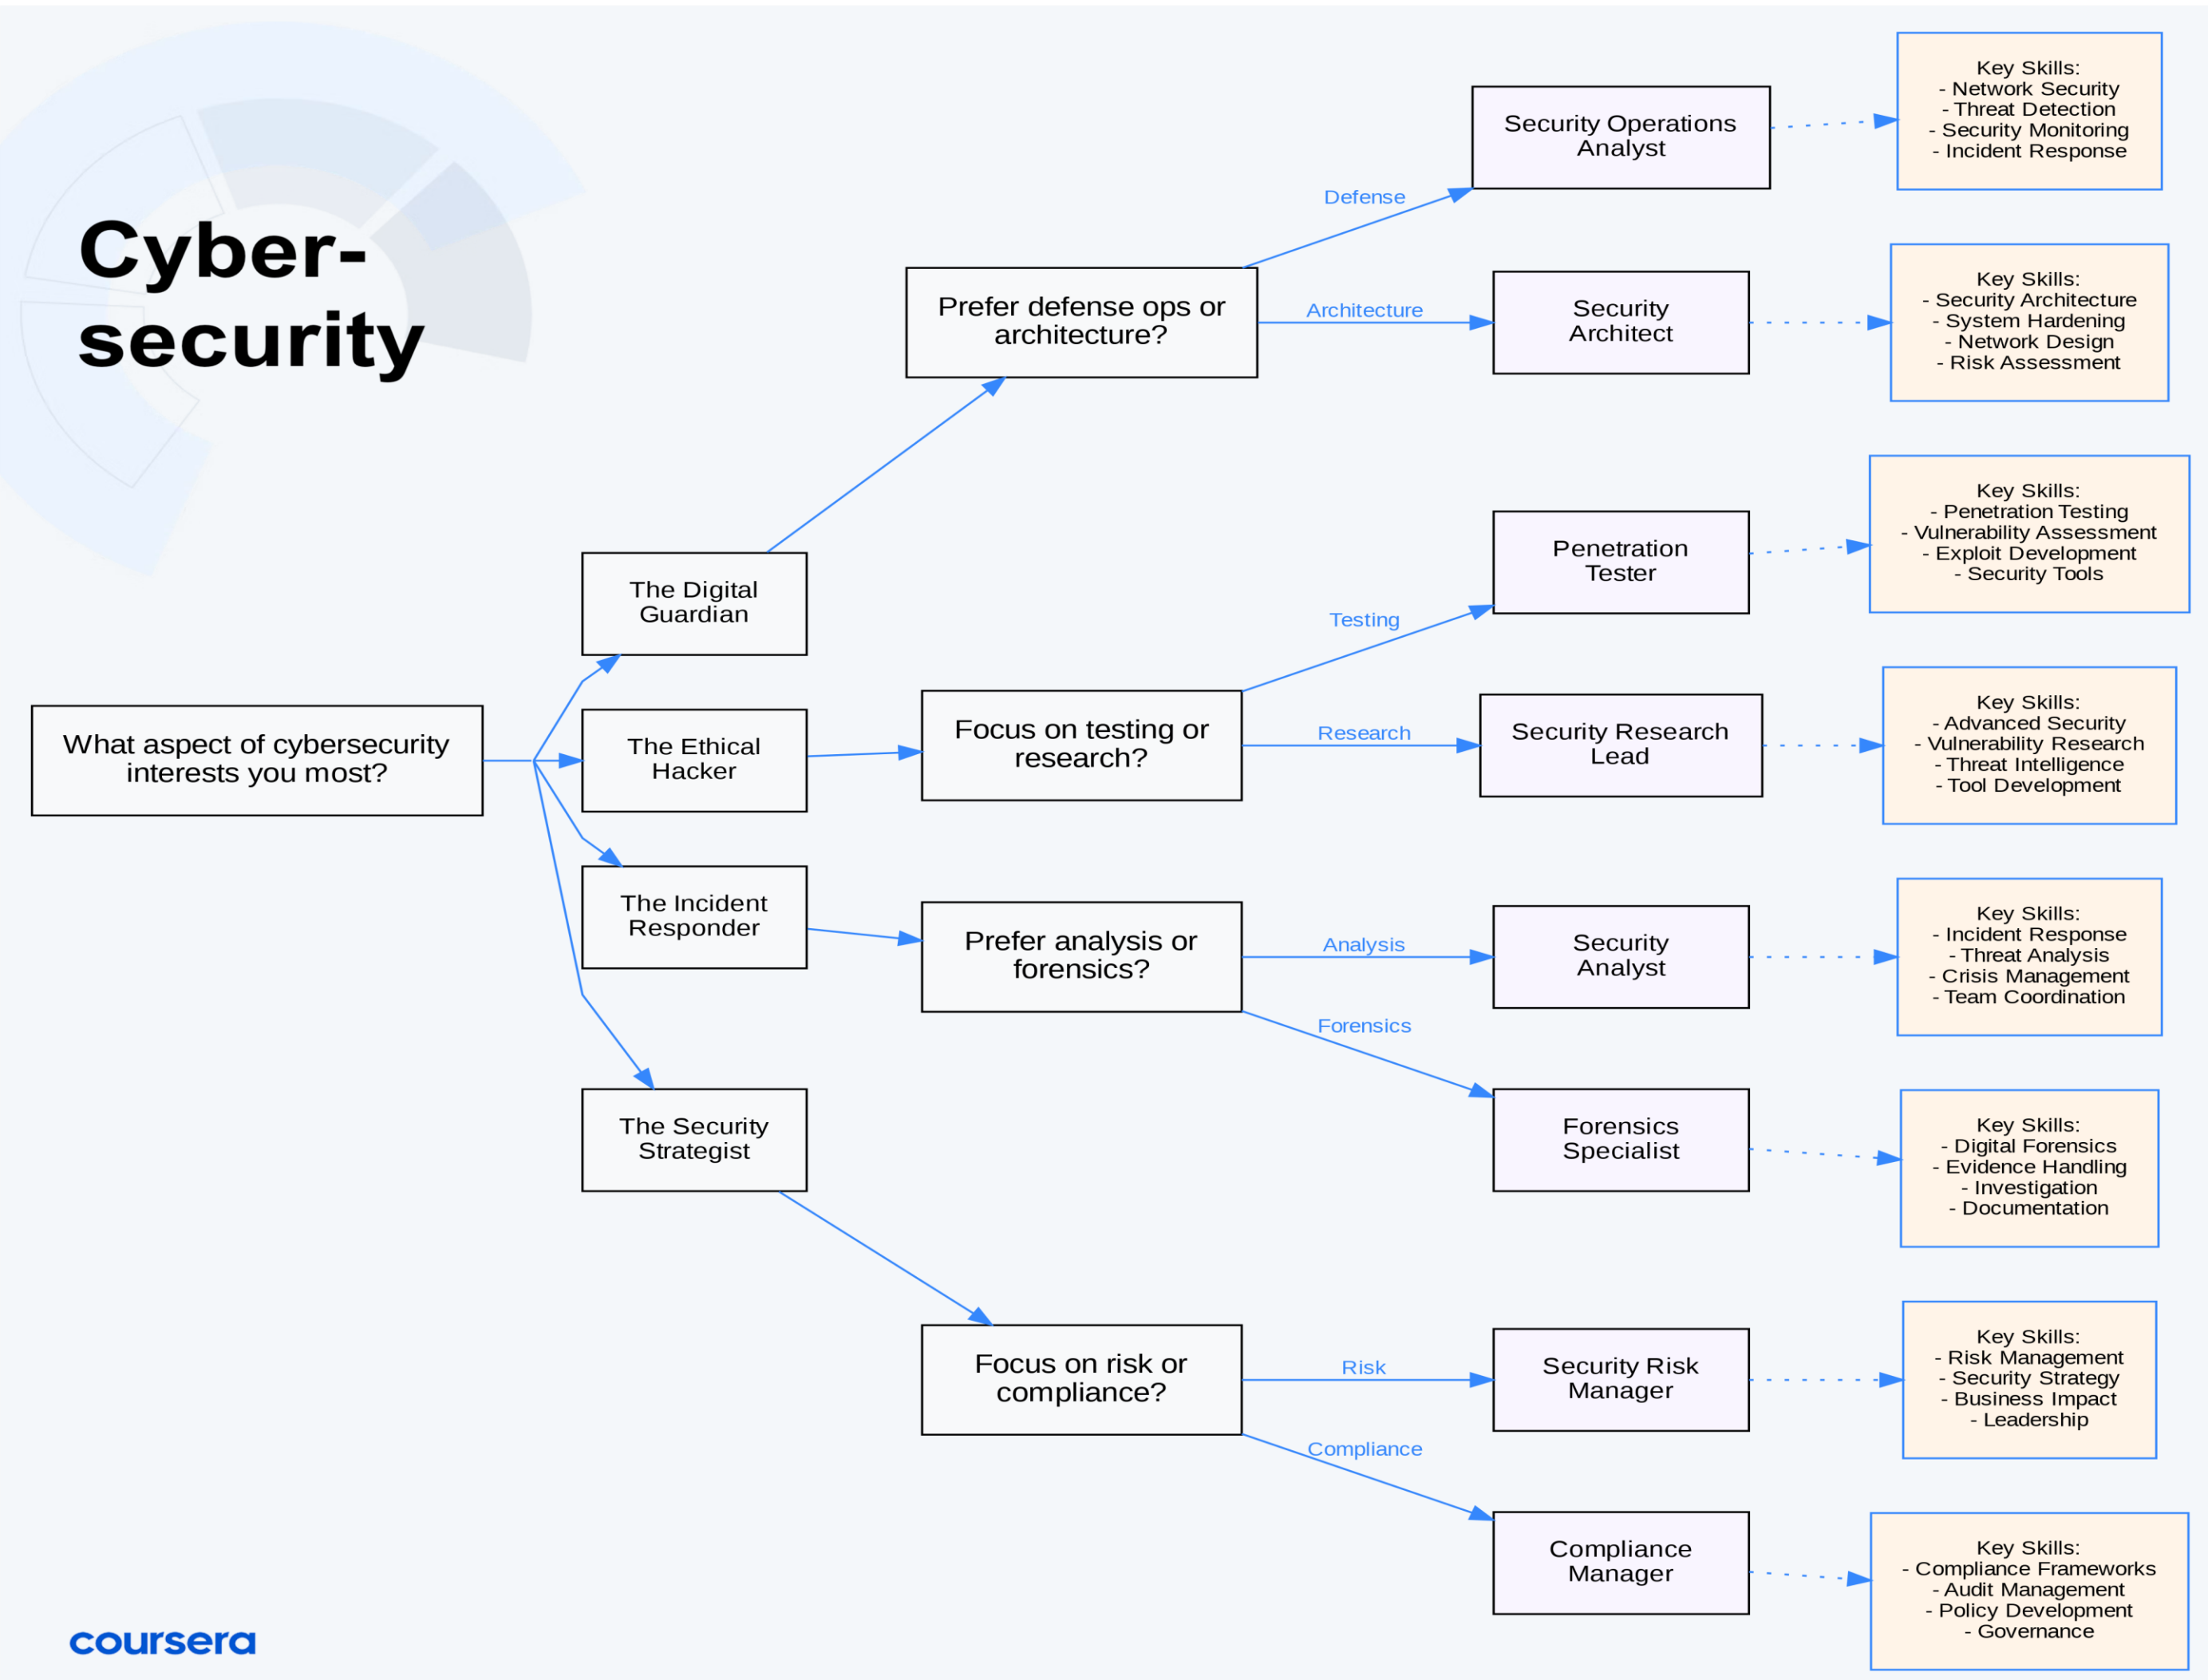

You Say Trend, I say Threat

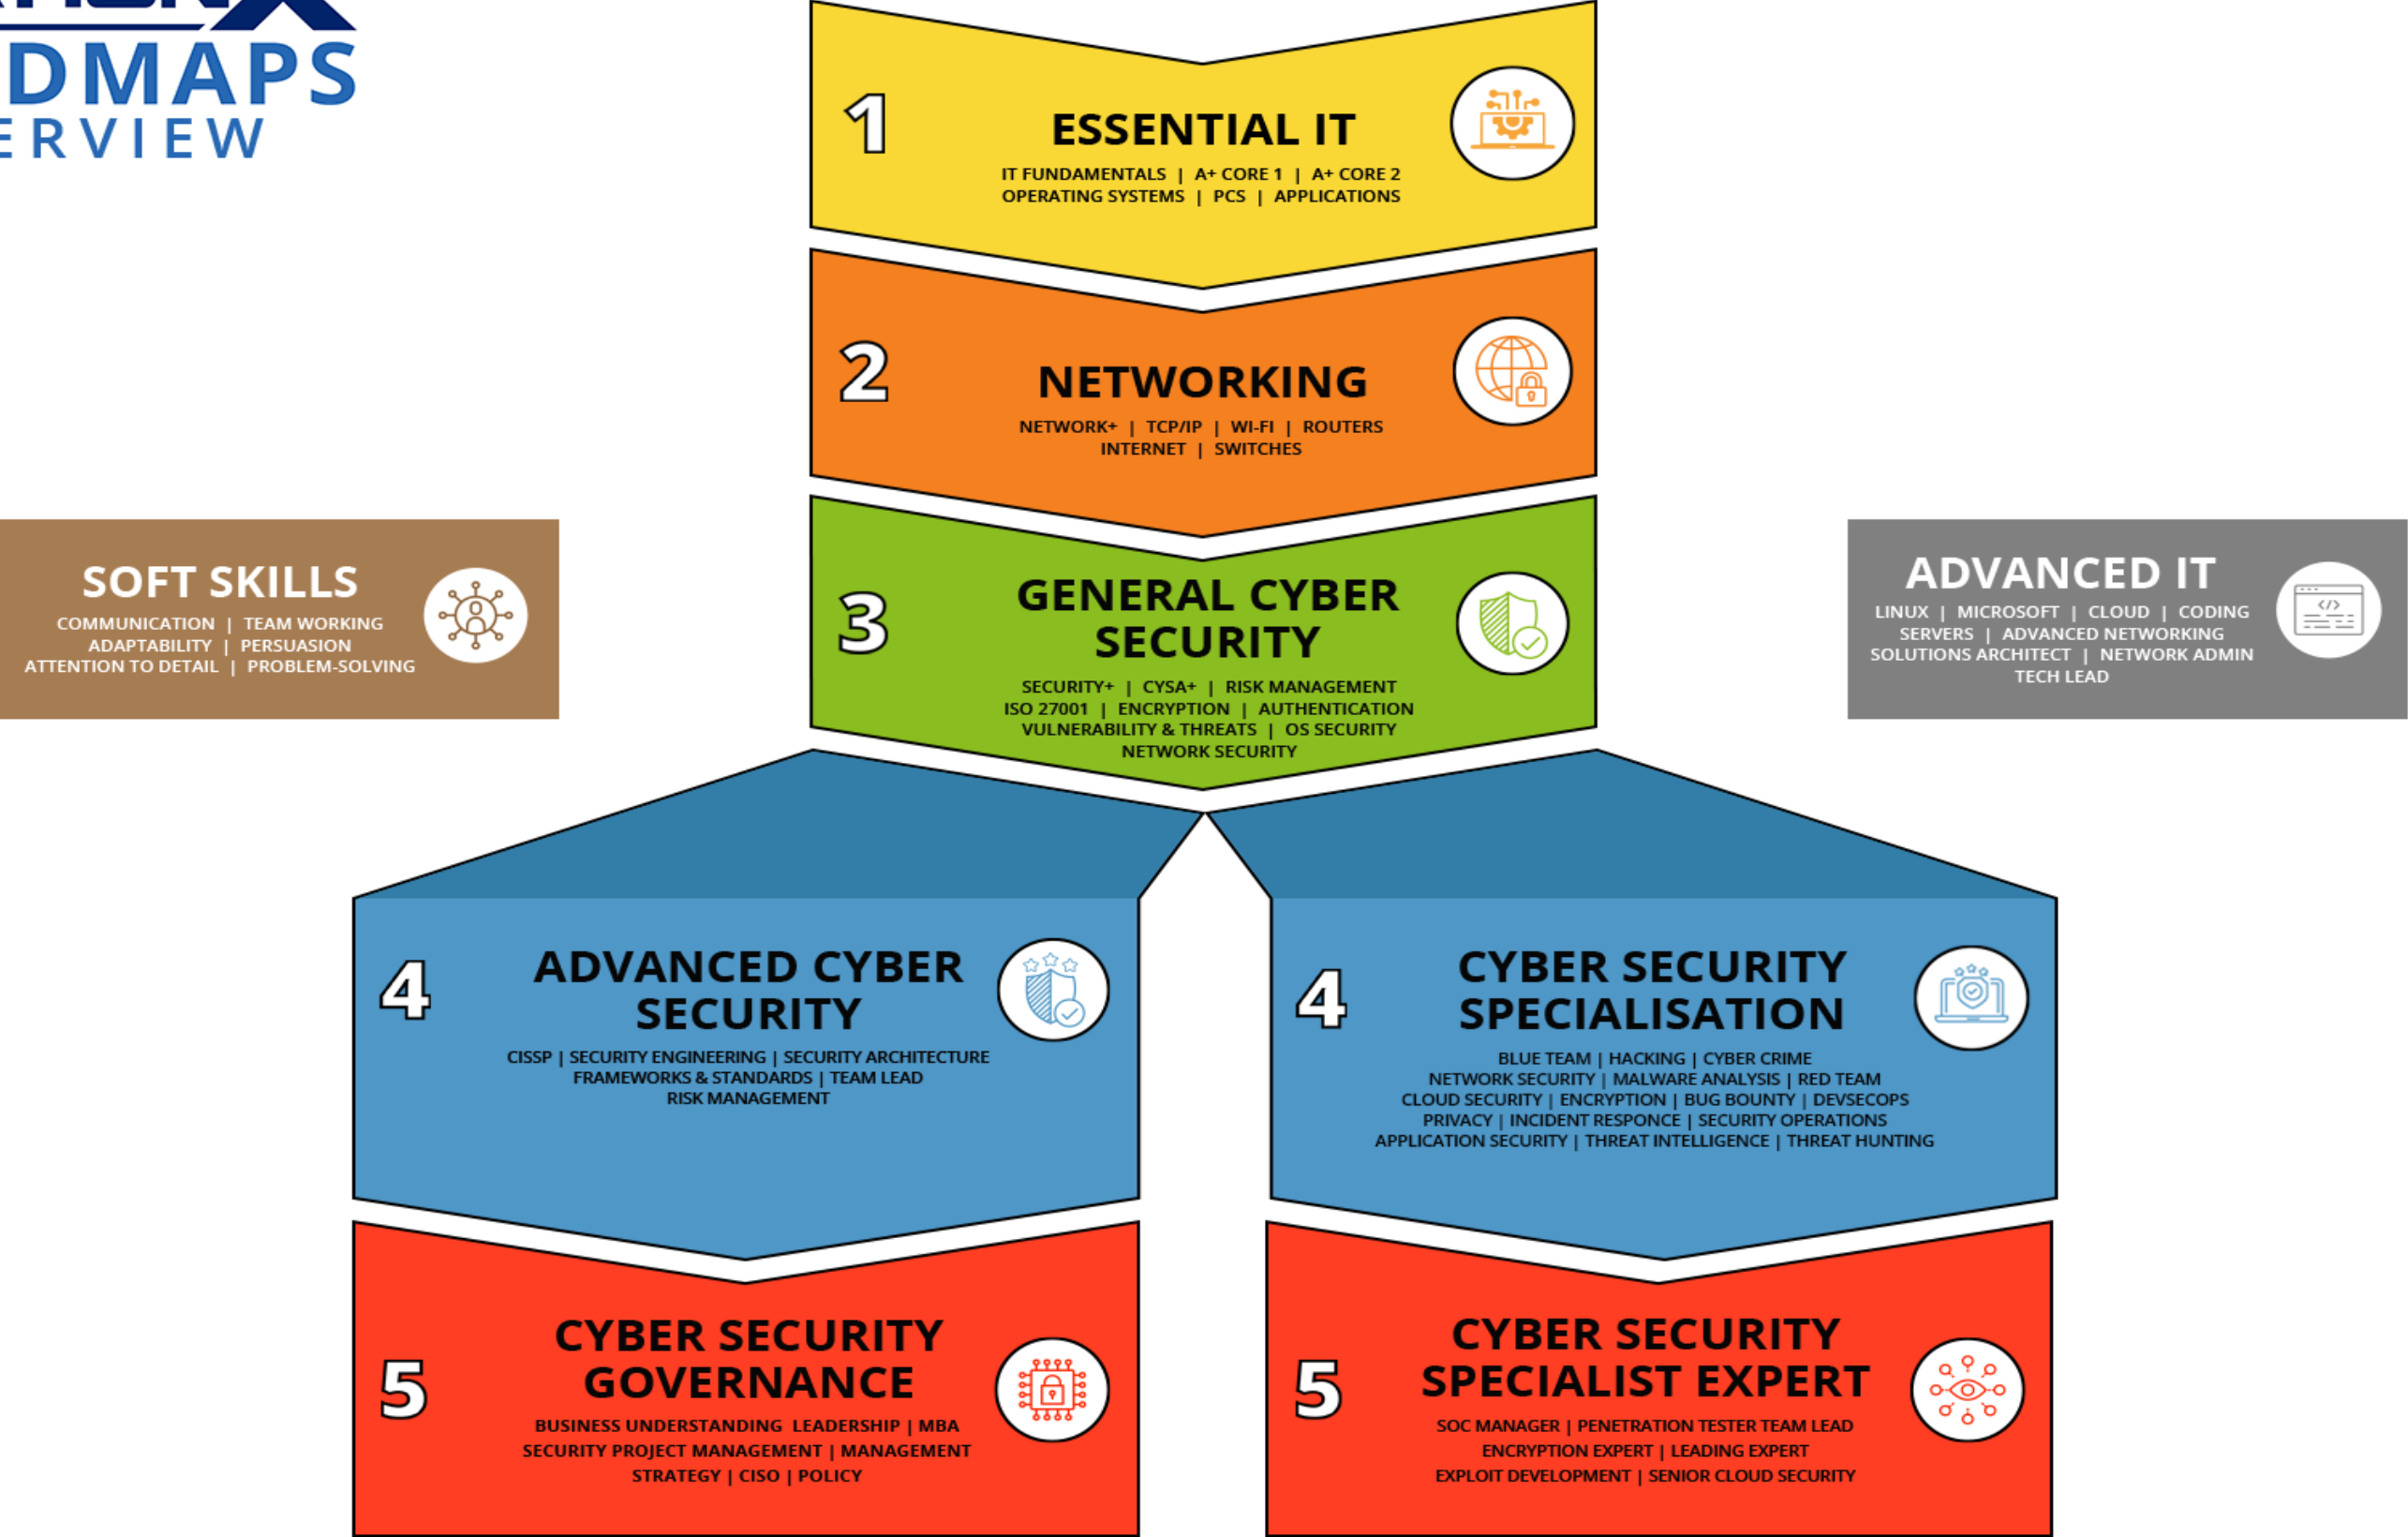

Trend	Threat
 FinTech	Lacks of universal protective framework
 Trust	Losing trust due to inability to transform securely
 The Open Banking Revolution	Data sharing within the FinTech ecosystem
 The Internet of Things	Security beyond the traditional device perimeter
 Digital Transformation	Delayed digital transformation due to the fear of new cyberthreats
 Blockchain	'Untraceable' thefts like the DAO attack, crypto-miners
 Machine Learning and Artificial Intelligence	Smart botnets for scalable attacks
 Regulatory Challenges	Penalties for improperly protecting customer data

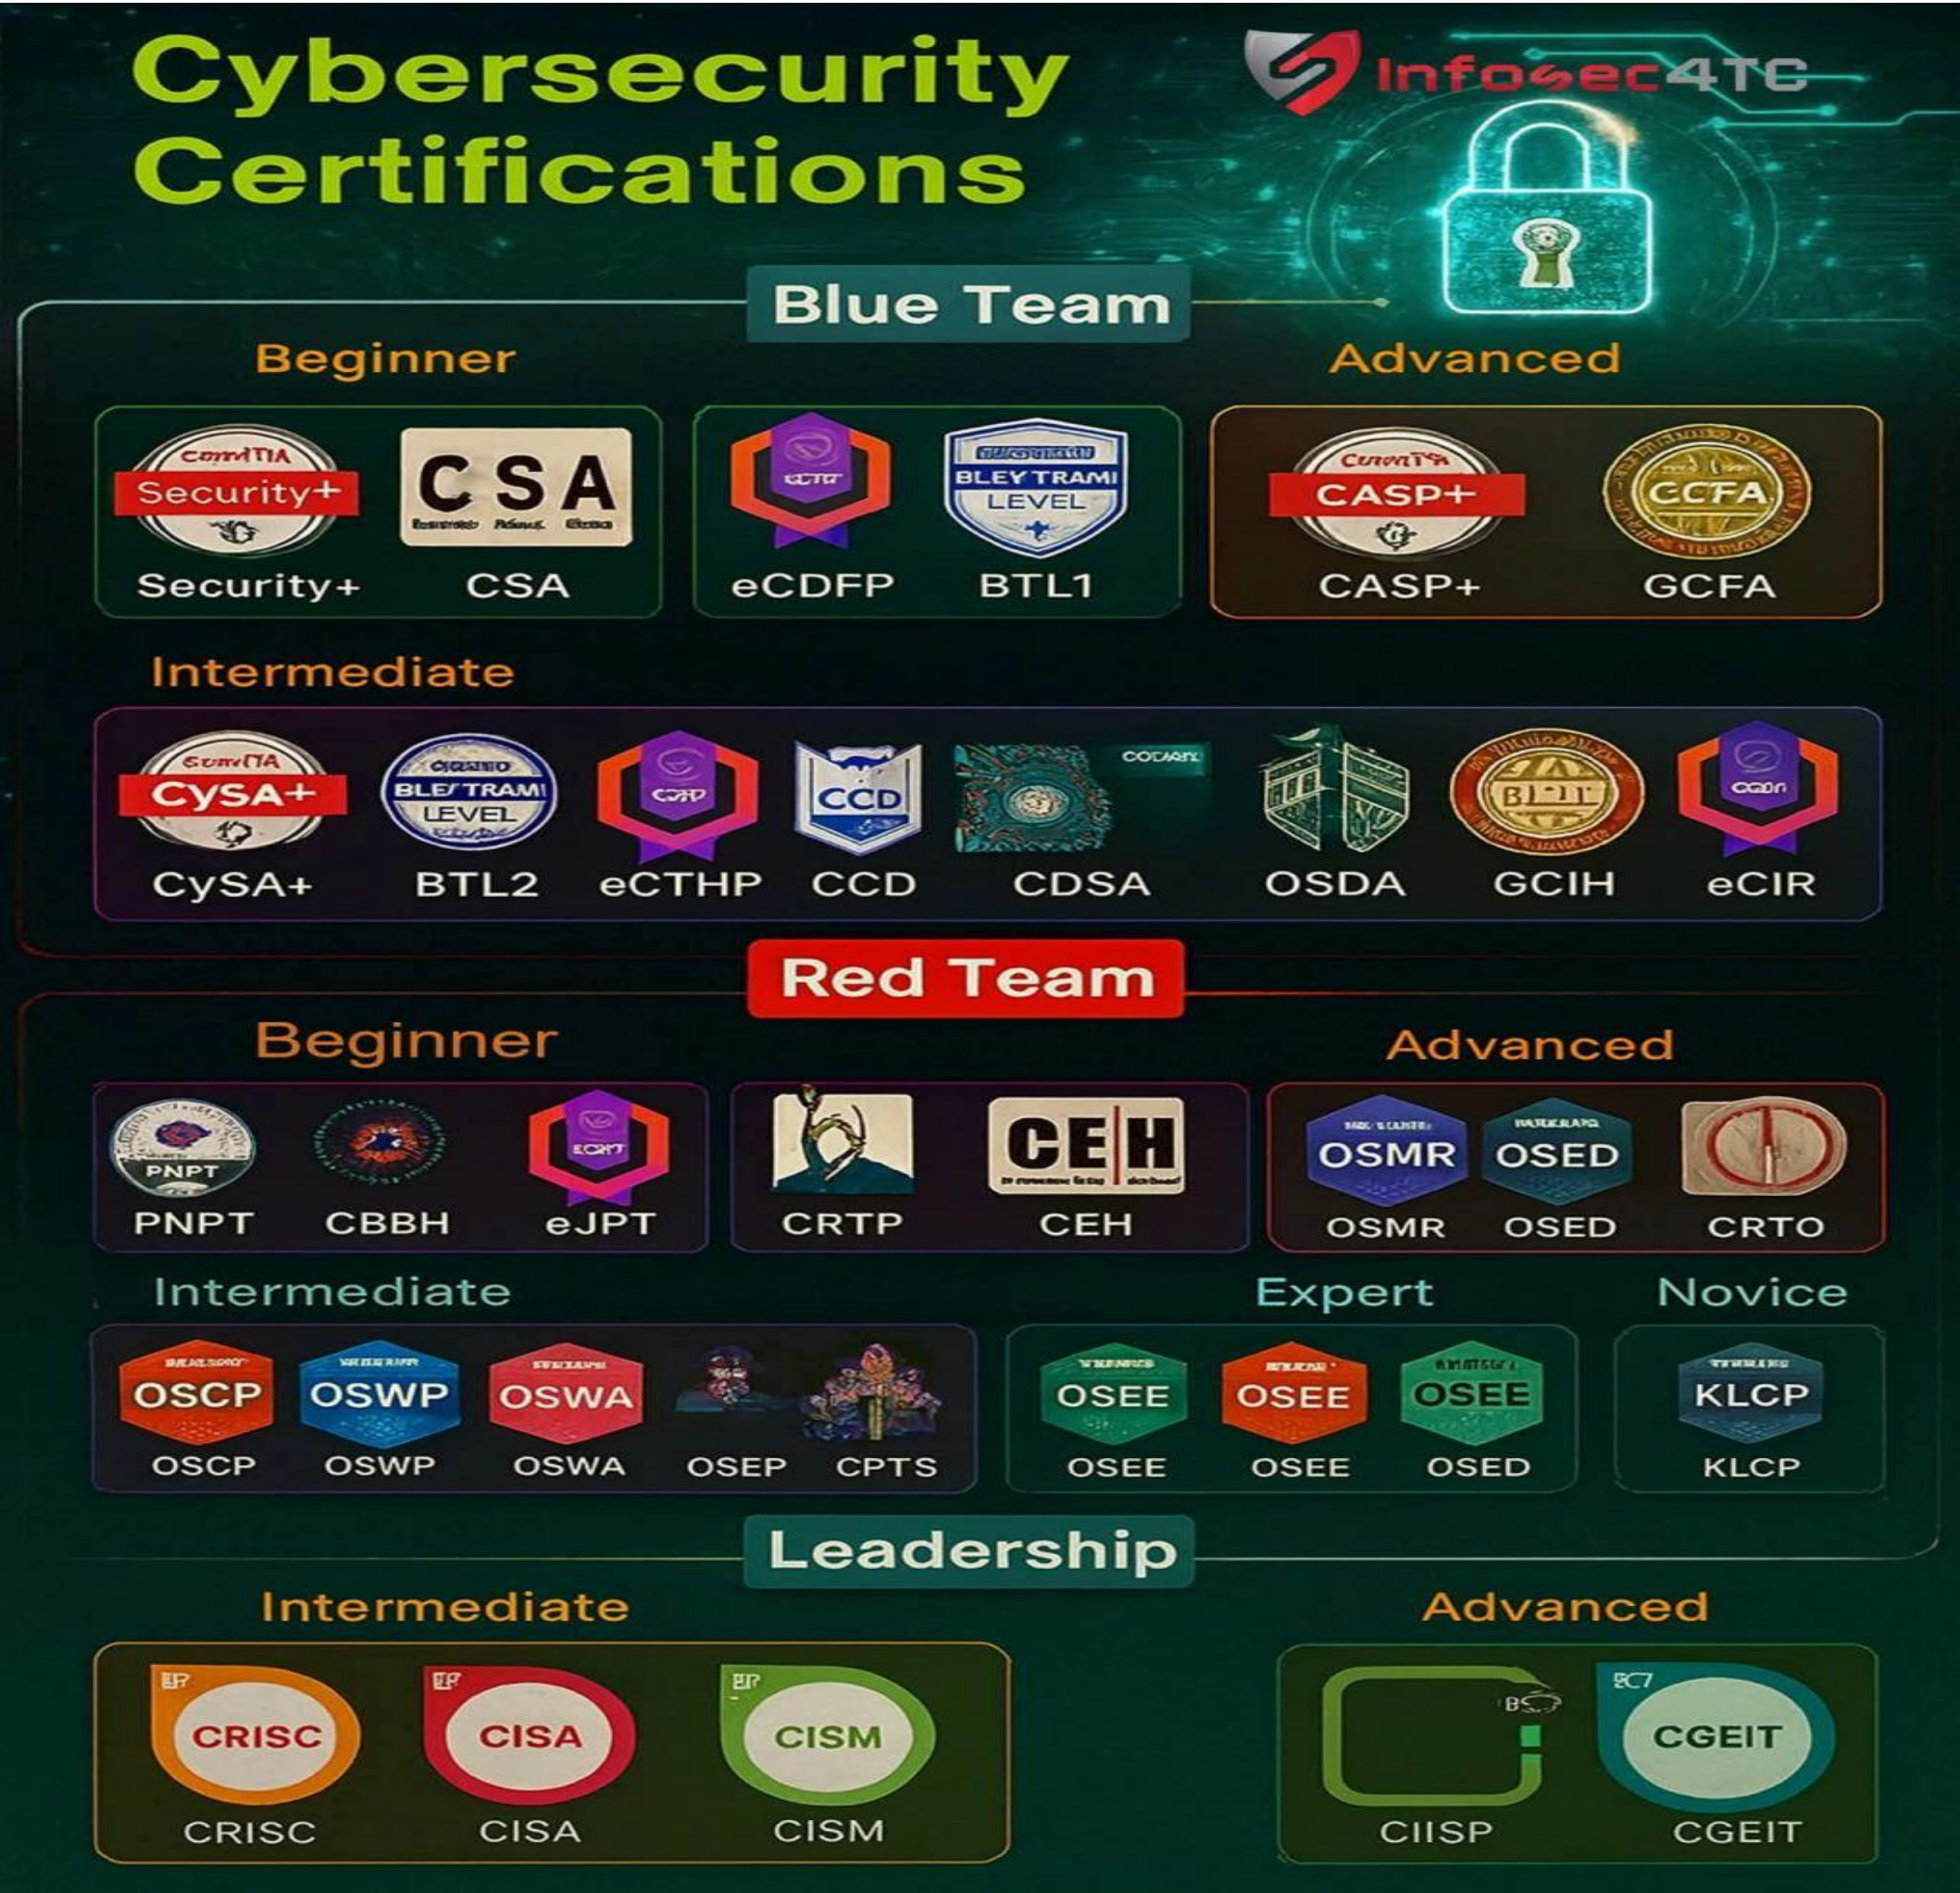

Cyber Security Career Paths

Skills Required to Progress in Cyber Security Domain
